

Bees and wasps have very high energy needs, so they are the champion pollinators. They need pollen and nectar from flowers for survival. Bees prefer flowers that are brightly colored, full of nectar and smell sweet. This photo shows a bee with pollen all over its mouth and legs. The honey bee is a builder, nurse, guard, farmer, janitor, chef, waiter, dancer, babysitter and a warrior who is willing to give his life for the safety of the other bees.
